STAR:ODDI

Logging Life Science

Multiple sensors & small size

Long life and large memory – up to 9 years

Continuous recordings of Temp-Depth every 2 min for 2.5 years in DST milli-TD.

Depth sensors for shallow to deep ocean

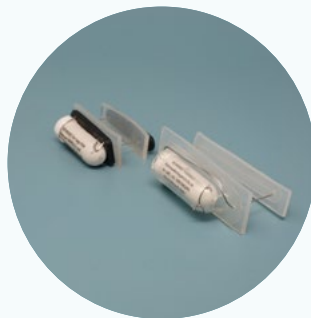

Ranges up to 3000 m. Select the most suitable depth range to optimize depth accuracy.

Customized text on housing

Return info for recapture purposes.

Optional spaghetti tag when implanted

Tag holder kits for external tagging

DST floats to increase recapture rate
