

FATHOM SOFTWARE

Fathom is a comprehensive collection of tools that provide deep visibility into your acoustic telemetry data and make all of your datasets easy to manage.

Fathom simplifies how you study animals and share your findings, streamlining the crucial work required in the time period between data gathering and publication. The Fathom platform consists of five applications that can be used alone or in conjunction with one another to give you full visibility into all aspects of your research efforts.

BENEFITS

- Simplify data collection in the field by using a smartphone or tablet
- Instantly back up detection and environmental data to the cloud while providing real-time access to it
- Mark GPS locations for easy deployments and retrievals, record field data and offload data from underwater receivers using Fathom Mobile
- Track migratory species on the move with Fathom Live and get alerts when a tagged animal is in a designated area

SPECIFICATIONS

POWERFUL TOOLS TO IMPROVE RESEARCH

Fathom Central is a cloud-based storage hub for saving, managing and visualizing your acoustic telemetry data. It provides simple online tools to help with all phases of your study and helps you quickly prepare detection data and metadata for export to telemetry networks.

Fathom Connect lets you configure, initialize and offload data from Innovasea receivers from your desktop.

Fathom Mobile lets you use an Android mobile device to connect to your VR-2 family 69 khz receivers and view health and detection information.

Fathom Live gives you real-time notifications about animal detections and environmental conditions and provides charting tools to help you visualize and interpret data quickly and easily.

Fathom Position lets you perform your own fine- scale positioning and generate your own animal tracks at any time and access your data from anywhere.

FATHOM SIMPLIFIES STUDY MANAGEMENT AND ENABLES MORE COLLABORATIVE RESEARCH

PAIR WITH

- **Innovasea acoustic receivers** – Offload and manage your data with Fathom Connect and Fathom Central
- **Innovasea acoustic transmitters** – View all tag data using Fathom Central Workspaces
- **Fathom Live Hub** – Uploads tag and sensor data to Fathom Live dashboard

About Innovasea

Innovasea designs the world's most technologically advanced aquatic solutions for fish tracking and fish farming – and builds them to withstand the toughest conditions. We partner with customers to fully understand their needs and solve their most pressing challenges. It's all driven by a commitment to make our ocean and freshwater ecosystems sustainable for future generations. **Today. Tomorrow. For life.**
